

# LI-ION BATTERY LED TAIL LIGHT UN-101

## PRODUCT DESCRIPTION

### Product Description and Application

A rechargeable Li-ion battery LED bicycle tail light, in mini design, specially designed to fit all bike types.

## FEATURES

- 1 x super bright red LED creates a bright light distribution
- Modern and innovative design
- ON-FLASH-OFF switch button
- Visibility in a 180 degrees angle, which provides more safety
- Including an adjustable rubber seat post bracket
- Available in colour white, with grey switch button
- Direct USB adapter (no need for charging cable)
- Rechargeable Li-ion battery
- Low battery indicator

## TECHNICAL INFORMATION

### Housing

- Main housing made of impact resistant ABS
- Lens parts are made of a red transparent PMMA
- Integrated direct USB adapter (no need for charging cable), which is protected and covered by a black TPE (Thermo-Plastic-Elastomer) cap
- Splash and rain water proof

**Rubber bracket**

An adjustable rubber seat post bracket allows an easy (dis)mounting of the tail light

**Vertically adjustment tail lamp housing**

A special connection between the rear lamp housing and bracket allows a vertical adjustment of the tail light

**Switch**

Easy operating ON-FLASH-OFF push button at the side, made of grey TPE (Thermo-Plastic-elastomer)

**Functions**

Steady and flash

**Batteries**

1 x rechargeable Li-ion battery (3.7V Li-ion 80mAh), which can be recharged by a direct USB adapter

**Charging time**

1 hour (green light of low battery indicator lights while charging and turns off when battery is fully charged)

**Lighting duration**

2.5 hours

**Low battery indicator**

A low battery indicator, on top of the rear light starts to appear red, about ½ hour before the battery becomes too low

**Dimensions**

15 x 20 x 64 mm (Height x Width x Depth, for housing w/o bracket, including TPE cap which covers the direct USB connector)

**Weight**

17 g

**Standards**

Meet the CE standard

**INSTALLATION****Installation & Maintenance**

- Check the proper function of your bicycle light before every ride
- Don't forget to switch off your light after use
- For your own safety check the brightness of the tail light before every ride and recharge the battery when low battery indicator lights
