- 1 x Chrome plated screw M6 with 5 mm hexagon socket for Allen key, for 0° - 60° angle adjustment, tighten with max.10 Nm

Dimensions

- Available in 2 bar bore sizes: 25.4 and 31.8 mm
- Available in 3 different extensions: 90(95), 110 and 125(130) mm

- AH-10: 25.4 mm/90 mm, AH-11: 25.4 mm/110 mm, AH-12: 25.4 mm/130 mm
- AH-20: 31.8 mm/95 mm, AH-21: 31.8 mm/110 mm, AH-22: 31.8 mm/125 mm

Weight

About 290 g (including all screws)

INSTALLATION

Installation & Maintenance

- Before you mount an A-head stem check first if the diameter corresponds with the diameter of your fork tube as well with your handlebar diameter
- For assembly of the A-head stem please check the [A-head stem assembly instructions](#)
- Tighten the screws while mounting the A-head stem with the instructed maximum torque (compare above in chapter "**Fastener**")
- Check if your A-head-system is still mounted properly before every ride
